

Pressure Data:

1/26/2023 @ 6PM

7B Tubing Press = 87.14 psig
7B Annulus Press = 443.2 psig
7B Brine Injection Rate = 272.3 GPM
6X Tubing Press = 185 psig
6X Annulus Press = 184.6 psig

24-Hour oil withdrawal ops ongoing from PPG
7B transferring to PPG 20.
Cum Oil Injection into PPG 20:

- 1/25 = 275 bbls
- 1/26 = 1,601 bbls
- Total = 1,876 bbls

1/27/2023 @ 5AM

7B Tubing Press = 83.94 psig
7B Annulus Press = 439.6 psig
7B Brine Injection Rate = 259.8 GPM
6X Tubing Press = 185 psig
6X Annulus Press = 184.8 psig

Site Observations:

Per Corey Shircliff email update (1/26/2023) LDNR and Westlake staff performed a visual inspection of the central lake at Sulphur Mines dome via airboat today. Two additional bubbling sites were located in the water, near the western shore of the lake and NE of the bubbling adjacent to the PPG 22 well pad.

- GPS coordinates of the bubbling will be obtained via airboat on Monday (1/30).

Operational Notes:

None.
